

I2 Management encourage you to take a look at the 2nd biggest seller in USA

According to ILTA compareDocs has become the 2nd biggest selling software tool in the USA.

The ability to compare word to word, pdf to pdf, word to pdf and/or anything to anything sees this product as the leading selling product of its kind in the USA.

What to expect:

- Easy to deploy
- Enriched pdf to pdf comparison
- Stream lines the document review process
- Integrates with business applications and systems
- Increased ability to work with track changes. User can now accept track changes.
- Changes to images will be picked up with compareDocs
- Ability to compare documents from a mobile device.

Content Crawler

We can expect a new version of Content Crawler to be available 3rd Quarter.

The Content Crawler ensures all documents in the DMS are text searchable where possible – both new and legacy documents.

The crawler not only OCR's the document but adds a test layer which enables your search engine to find every document and locate the word within the document.

If you would like to learn more about pdfDocs products please contact **Fiona Hocking** 03 8686 1520 or fiona@i2m.com.au

compareDocs best in

- accuracy,
- speed,
- workflow

Metadata Assistant

What is Metadata?

Metadata is information about the document and is stored within the document itself, for example, who created it, who edited it, what changes were made, when and by who.

Document metadata has the potential to embarrass or negatively impact a company financial well-being.

Metadata Assistant integrates with MS Office to provide users with a high level of confidence that various document metadata types are cleansed from confidential or sensitive documents before being sent to clients or external parties.

The stripping of a documents metadata helps:

- Prevent disclosure of confidential or sensitive information
- Reduce financial and reputational risk
- Ensure regulatory compliance
- Ensure enterprise compliance to metadata management.
